

Satisfaction with Democracy in Australia: Pulse report, June 2026

Executive summary

After a statistically significant increase in overall satisfaction with democracy in March 2026, results in June 2026 show a decline in satisfaction, decreasing to 55.1% in June 2026 from 62.7% in March 2026. This remains below the high recorded in January 2026 (64.8%) and is the second lowest result since the survey began.

The proportion of respondents who were “very satisfied” decreased to 16.3% in June 2026. The proportion who were “satisfied” also decreased (38.8% in June 2026 from 41.5% in March 2026), while the proportion who were neither satisfied nor dissatisfied increased (22.7% in June 2026 from 19.9% in March 2026). The proportion of respondents who were “very dissatisfied” increased by 1.0 percentage point in June 2026 to 5.6%.

Across demographic groups, satisfaction decreased for all groups in June. The largest decreases were among regional (-10.1 percentage points to 44.7%), those aged 35-64 (-10.0 percentage points to 50.6%), and women (-8.2 percentage points to 49.2%).

Perceived performance decreased in June for all democratic elements following the general increase in March 2026. However, the largest gaps between importance and performance continue to be concentrated in areas related to democratic integrity and fairness, including whether there are enough checks on political power, whether courts are free from political influence, and whether the law is applied impartially. By contrast, elements related to information access, media, and learning about democracy showed relatively small gaps, and in some cases performance exceeded perceived importance.

Trust in institutions also decreased for all institutions in June 2026, in most cases moving back toward levels observed in February 2026. The largest decrease was recorded for the Australian Electoral Commission, while ambulance, fire, and other emergency services remained the most trusted institutions and political parties remained the least trusted.

The next wave is planned for September 2026.

Results

Satisfaction with democracy

Overall satisfaction (“satisfied” + “very satisfied”) has decreased 7.6 percentage points in June 2026 from March 2026 (55.1% from 62.7%). It sits 3.0 percentage points below December 2025 (58.1%).

In terms of individual categories:

- the proportion of those who were “very satisfied” (16.3%) decreased 4.9 percentage points
- the proportion of those who were “satisfied” decreased 2.7 percentage points to 38.8% in June 2026
- the proportion of those who were “neither satisfied nor dissatisfied” increased 2.8 percentage points to 22.7%
- the proportion of those who were “dissatisfied” increased 2.4 percentage points to 12.9%, which is 4.3 percentage points higher than January 2026 (8.6%).
- the proportion of those who are “very dissatisfied” increased 1.0 percentage points to 5.6%.

Individual characteristics of satisfaction

After increases in overall satisfaction for most groups in March 2026, there were decreases in satisfaction, and in some cases significant decreases, for every demographic group in June 2026. However, men's satisfaction remains higher than women's and higher than most other demographic cohorts. Both men's and women's satisfaction decreased significantly (by 7.0 and 8.2 percentage points respectively) to 61.4% for men and 49.8% for women.

After a decrease in satisfaction of 5.6 percentage points in February 2026 and a further increase of 12.5 percentage points in March 2026, satisfaction for people born overseas decreased by 7.9 percentage points in June 2026. Satisfaction for people born overseas is now 7.8 percentage points higher than people born in Australia, which reflects similar differences in satisfaction between these two groups for most of 2025. These cohorts had swapped over in January 2026 and February 2026, when people born in Australia had higher satisfaction than people born overseas for the first time since November 2023.

Satisfaction decreased significantly for people living in regional areas (-10.1 percentage points to 44.7%). The difference in satisfaction between people living in metropolitan areas

and people living in regional areas has now broadened to 14.1 percentage points, which is an increase in difference of 3.5 percentage points from March 2026.

People aged 18-34 had a decrease in satisfaction of 4.5 percentage points (to 61.9% in March). This age group has had the highest satisfaction of the age groups for 9 out of 11 waves. Satisfaction also decreased significantly for people aged 35-64 (-10.0 percentage points; 50.6% in June), as well as for people aged 65+ (-6.3 percentage points; 56.0% in June).

Note: proportions show those who selected “Satisfied” or “Very satisfied” to the question “How satisfied or dissatisfied are you with the way democracy works in Australia?”

Importance of democratic elements

Perceived importance decreased for almost half of the items in June 2026, although these changes were relatively modest and within the margin of error. The biggest decreases were for “Elections are fair” (-4.1 percentage points to 68.6%) and “People get a say on the government’s priorities” (-3.5 percentage points to 54.8%). The largest increase was for “There are enough checks to ensure politicians and government officials can’t abuse their power (+3.2 percentage points to 69.3%).

Respondents continue to assign the highest importance to core democratic safeguards and fairness-related elements, particularly whether the courts and law system are free from political influence (69.7% in June), whether there are enough checks to ensure politicians and government officials can’t abuse their power (69.3%), elections are fair (68.6%), and whether human rights are protected (67.3%). Lower importance continued to be attached to more participatory or expressive elements, including whether people can freely express political opinions (53.5%), whether people get a say on the government’s priorities (54.8%), whether people of all ages can easily learn how democracy works (55.6%), and whether there is a free and independent media (57.7%).

Performance of democratic elements

After slight increases in March 2026, the perceived performance (“good” + “very good”) of various key elements of democracy decreased in June 2026 for every element, with

substantial decreases recorded for some of these. The largest decreases were for “there are enough checks to ensure politicians and government officials can’t abuse their power” (-8.7 percentage points to 40.6% in June), “elections are fair” (-7.7% percentage points to 59.6%), and “a free and independent media” (-7.2 percentage points to 49.6%), the lowest it has been since the survey began.

After sharp increases in performance for most elements in January, and sustained higher levels in February and March, performance has returned to similar levels observed in November last year. In June 2026, the highest performance ratings were for “Human rights are protected” (63.1%), “Free access to information” (61.5%), “Public services are reliable” (60.4%), and “Elections are fair” (59.6%). The weakest-performing elements continue to relate to voice, accountability, and institutional integrity, indicating that these remain key areas of concern. These are: “There are enough checks to ensure politicians and government officials can’t abuse their power” (40.6%), “people get a say on the government’s priorities” (43.1%), and “A free and independent media” (49.%).

The gap between importance and performance

The importance-performance gap is measured by subtracting perceived importance from perceived performance for each element each month. This gives an indication as to whether people feel different elements of our democracy are stacking up to their expectations of how they should be performing.

The largest gaps continue to be concentrated in areas related to democratic integrity and fairness. The gaps for the three elements with the largest gaps widened further in June: “there are enough checks on politicians’ power” (–28.8 percentage points in June, an increase of 12.0 points from its gap of –16.8 percentage points in March), “courts are free from political influence” (–19.8 percentage points in June, an increase of 5.1 points from its gap of –14.7 points in March), and “the law is applied impartially” (–16.8 percentage points in June, an increase of 3.2 percentage points from its gap of -13.6 points in March). Democratic elements related to information access and service delivery continue to show much smaller gaps.

Two elements that performed above their perceived importance in February continued in June: “people of all ages can easily learn how democracy works” (+3.5 points) and “people can freely express political opinions and ideas about society” (+3.5 points).

Trust in institutions

Trust decreased by an average of 4.3 percentage points for all institutions in June 2026, following an average change of +1.6 percentage points in February.

The Australian Electoral Commission recorded the largest decrease in trust with a 7.4 percentage point decrease (from 66.5% in March 2026 to 59.1% in June 2026), followed by Police and law enforcement (from 72.5% in March 2026 to 65.7% in June 2026), and the

Ombudsmen (from 66.1% in March 2026 to 59.4% in June 2026). Trust decreased for all institutions in June 2026, although for Public Servants the decrease was the smallest, with a 0.1 percentage point drop (52.0% in June 2026).

Ambulance, fire, and other emergency services continue to have the highest trust of any institution (85.5%). Political parties continue to have the lowest trust (27.9%), dropping 5.0 percentage points in June 2026.

Overall, trust in institutions remains broadly stable since August 2025, with an average change of -1.6 percentage points. The largest decreases in this time period have been for the Australian Electoral Commission (-6.1 percentage points) and Commonwealth/Federal Government (-4.5 percentage points).

What are the views of those who are not satisfied with democracy?

The proportion of respondents who are not satisfied (either "very dissatisfied", "dissatisfied", "neither satisfied nor dissatisfied", or "not sure") but believe "we need to continue building upon what we've got to improve democracy in Australia" Increased by 3.1 percentage points (from 39.2% in March 2026 to 42.3% in June 2026). This represents an increase of 3.4 percentage points across the whole sample.

The proportion of respondents who believe "we need to remove what we've got and start again to improve democracy in Australia" decrease by 2.3 percentage points (25.2% in June 2026). This represents an increase of 1.0 percentage points across the whole sample.

The proportion of respondents who believe "there are political systems other than democracy that will work better in Australia" decreased by 1.3 percentage points to 6.1% in June 2026, with no change to the overall sample.

Response category	Dec 2024 (%)	Mar 2025 (%)	Aug 2025 (%)	Sep 2025 (%)	Nov 2025 (%)	Dec 2025 (%)	Jan 2026 (%)	Feb 2026 (%)	Mar 2026 (%)	Jun 2026 (%)
We need to continue building upon what we've got to improve democracy in Australia	47.4 (20.6)	44.5 (17.4)	45.6 (18.8)	44.6 (19.1)	40.0 (18.4)	41.9 (17.6)	42.5 (14.9)	45.2 (18.7)	39.2 (14.6)	42.3 (19.0)
We need to remove what we've got and start again to improve democracy in Australia	22.0 (9.6)	20.7 (8.1)	22.8 (9.4)	23.4 (10.0)	26.5 (12.2)	24.1 (10.1)	26.0 (9.1)	25.0 (10.3)	27.5 (10.3)	25.2 (11.3)
There are political systems other than democracy that will work better in Australia	6.2 (2.7)	7.8 (3.1)	8.1 (3.3)	7.4 (3.2)	8.5 (3.9)	6.1 (2.6)	4.5 (1.6)	7.4 (3.0)	7.4 (2.8)	6.1 (2.8)
Not sure	20.6 (9.0)	22.6 (8.8)	20.0 (8.3)	19.6 (8.4)	21.6 (9.9)	23.2 (9.7)	22.1 (7.8)	19.5 (8.1)	22.5 (8.4)	23.3 (10.4)
Other	3.9 (1.7)	4.4 (1.7)	3.5 (1.4)	4.9 (2.1)	3.4 (1.6)	4.7 (2.0)	5.0 (1.8)	2.9 (1.2)	3.4 (1.3)	3.1 (1.4)

Note: only respondents who previously selected "Very dissatisfied", "Dissatisfied", and "Neither satisfied nor dissatisfied" for the prior satisfaction in democracy question answered this question ("You indicated that you are [Very dissatisfied / Dissatisfied / Neither satisfied nor dissatisfied] with the way democracy works in Australia. Which of the following best reflects your opinion about democracy in Australia?"). Wave 1 and 2 responses excluded as the question was asked differently in those waves. Numbers in brackets reflect that response category's percentage of the whole sample.

Appendix

Since 2023, the Australian Public Service Commission in collaboration with the Office for Social Cohesion has surveyed a nationally representative cross-section of Australians on their attitudes toward democracy, trust in public institutions, and satisfaction with democratic processes across the following waves:

- Wave 1: Jun 2023
- Wave 2: Nov 2023
- Wave 3: Dec 2024
- Wave 4: Mar 2025
- Wave 5: Aug 2025
- Wave 6: Sep 2025
- Wave 7: Nov 2025
- Wave 8: Dec 2025
- Wave 9: Jan 2026
- Wave 10: Feb 2026
- Wave 11: Mar 2026
- Wave 12: Jun 2026.

Wave 1, conducted in June 2023, and wave 2, conducted in November 2023 were run as their own standalone surveys, with wave 2 providing a post-referendum examination of satisfaction with democracy. These two waves involved a non-representative sample, but data have been weighted to Australian population statistics. The results from the first two waves were reported in detail in our [Trust and Satisfaction in Australian Democracy report](#).

Wave 3 onwards consists of five key questions from the original democracy survey that were placed inside of the TAPS survey, a regular, national, online survey that measures public satisfaction, trust, and experiences with Australian public services. The five questions were selected to be able to capture core elements of the original questionnaire while aligning with existing TAPS questions and themes. TAPS is asked to a sample representative of Australian population statistics across age, gender, and location, thus no weighting has been applied.

While respondents in wave 3 onwards are shown different questions leading up to the democracy questions than those in wave 1 and 2, robustness checks on demographics

found that the same characteristics drive satisfaction with democracy, and with similar magnitudes, alleviating some cause for bias concerns, however order effects would still be present.

Democracy Module from Survey of Trust in Australian Public Services Questionnaire

Introduction text

In this section of the survey, we will ask about your experiences and thoughts of democracy in Australia. Australia's democracy is made up of many institutions, processes and principles. Democracy is a set of institutions and values that allow humans to decide, as equals, how they will live together. We are interested in your personal views about Australia's democracy.

Q1 - In thinking of what democracy means to you, how important do you consider each of the following elements of democracy? *[Scale from Not important at all, Somewhat important, Important, Very important, Not sure for each characteristic]*

- ☐ People can freely express political opinions and ideas about society
- ☐ Elections are fair
- ☐ The courts and law system are free from political influence, bias and external pressures
- ☐ Public services are reliable
- ☐ People get a say on the government's priorities
- ☐ Everyone is treated fairly regardless of their gender, ethnicity, sexuality, religion or other characteristics
- ☐ There are enough checks on senior politicians and government officials to ensure they cannot abuse their power
- ☐ The law is applied impartially regardless of who you are
- ☐ People of all ages can easily learn how democracy works
- ☐ A free and independent media
- ☐ Free access to information
- ☐ Human rights are protected

Q2 - How well do you think Australia performs in each of the following areas of democracy? *[Scale from Very poor, Poor, Fair, Good, Very good, Not sure for each characteristic]*

- ☐ People can freely express political opinions and ideas about society
- ☐ Elections are fair
- ☐ The courts and law system are free from political influence, bias and external pressures
- ☐ Public services are reliable
- ☐ People get a say on the government's priorities
- ☐ Everyone is treated fairly regardless of their gender, ethnicity, sexuality, religion or other characteristics
- ☐ There are enough checks on senior politicians and government officials to ensure they cannot abuse their power
- ☐ The law is applied impartially regardless of who you are
- ☐ People of all ages can easily learn how democracy works
- ☐ A free and independent media
- ☐ Free access to information
- ☐ Human rights are protected

Q3 - How much do you trust or distrust each of the following institutions? *[Scale from Strongly distrust, Distrust, Neither trust nor distrust, Trust, Strongly trust, Not sure for each characteristic]*

- ☐ Commonwealth/federal government
- ☐ Commonwealth/federal parliament
- ☐ Your state or territory government
- ☐ Your state or territory parliament
- ☐ Your local council
- ☐ Political parties
- ☐ Public servants (non-elected government employees at federal, state or local levels of government)
- ☐ Courts and legal system
- ☐ Police and law enforcement
- ☐ Public health institutions
- ☐ Ombudsman
- ☐ Ambulance, fire and other emergency services

- ☐ The Reserve Bank of Australia
- ☐ The Australian Electoral Commission
- ☐ Australian Human Rights Commission
- ☐ Australian Defence Force
- ☐ Public broadcasters (e.g. ABC, SBS)

Q4 - How satisfied or dissatisfied are you with the way democracy works in Australia?

Response options:

- ☐ Very dissatisfied
- ☐ Dissatisfied
- ☐ Neither satisfied nor dissatisfied
- ☐ Satisfied
- ☐ Very satisfied
- ☐ Not sure

Q5 (Ask only for respondents who chose *Very dissatisfied*, *Dissatisfied* or *Neither satisfied nor dissatisfied* for Q4)

Which of the following best reflects your opinion about democracy in Australia?

- ☐ We need to continue building upon what we've got to improve democracy in Australia
- ☐ We need to remove what we've got and start again to improve democracy in Australia
- ☐ There are political systems other than democracy that will work better in Australia
- ☐ Not sure
- ☐ Other (please specify): _____
